To Whom it May Concern

Aphex BioCleanse Systems signed a contract with BS Labs in Montana to test the following virus in February. The company received the results on March 4, 2020.

**Virus: Coronavirus strain 229E (ATCC #VR-740)**

**Host Cell Line: MRC-5 (ATCC #CCL-171)**

To summarize:

The test product, Hy-IQ (Lot #X-106-18), reduced the infectivity of Human Coronavirus by 2.75 log<sub>10</sub> (99.82) above the cytotoxicity level following a 1-minute exposure. The test product reduced the infectivity of the virus by ≥3.00 log<sub>10</sub> (≥99.90) above the cytotoxicity level following a 3-minute, 5-minute, 7-minute and 10-minute exposure time (no virus was recovered).

Of note, the virus after 10 minutes was completely killed.

Sincerely,

A handwritten signature in black ink that reads "David J. Weaver". The signature is written in a cursive style with a large, looping initial "D".
