

This emailed summary of test results serves as the final report for this project.

TRF Number: ACI01081120.999292

Project Number: A30704

Test Substance: SanAphex 4x, Lot 2021401

Test Substance Preparation: Ready to use (RTU)

Test Organism: *Staphylococcus aureus* (ATCC 6538)

Test Organism Adjustment Made: None

Neutralizer:

D/E Neutralizing Broth,

Lethen Broth + 0.28% Lecithin + 2% Tween 80 + 1.0% Sodium Thiosulfate,
and D/E Broth + 1.5% Lecithin + 5.0 % Tween 80 + 1.0% Sodium Thiosulfate

Exposure Conditions: Room Temperature (20°C), 55% Relative Humidity

Exposure Time: 1 minute

Soil Load: None required

Test Results

Lot 2021401:

Based on the R&D results for neutralizers, the test substance was neutralized effectively after 1 minute in each of the 3 neutralizers tested.

Thank you for choosing Analytical Lab Group; your business is very important to us.
