

EquAPHEX[®]

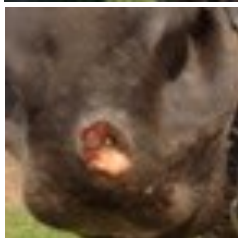

Wound Wash + Skin Protectant

A 19 year old thoroughbred had an infected puncture wound on his nose, full of puss, resulting in an abscess. When the abscess ruptured, it left a large hole. The vet arrived and cleaned the site, and agreed to forgo antibiotics. Treatment began immediately with EquAphex[®] WoundWash + Skin Protectant. With daily use of only EquAphex[®] WoundWash + Skin Protectant and warm water, the healing was amazing! There is no proud flesh and the hair remains dark.

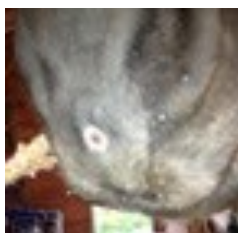

**Kills
99.99%
of Germs**

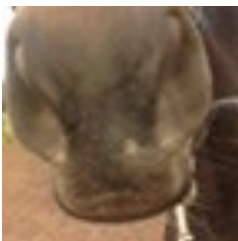

DAY 1—Ruptured abscess. Red, swollen, irritated. EquAphex[®] Wound Wash + Skin Protectant applied.

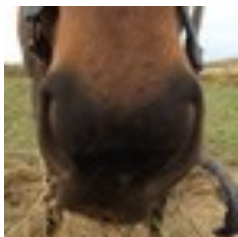

DAY 05—Open wound, free of infection, healing from the inside out. Applying EquAphex[®] twice a day.

DAY 14—Healing in full process. Wound closes, free of infection and irritation. Cease applying EquAphex[®].

DAY 21 —Closed wound. No proud flesh, and hair is growing back.

FINAL — Healing complete! Full recovery using EquAphex[®] for effective germ killing and healing.

Powered by Aphex: Effective Equine Wound Care

- Dual-purpose wound wash and antiseptic
- Cleans wounds and kills 99.99% of germs
- Protects for hours, killing germs even after drying, which aids in healing
- Highly effective and a small amount provides full killing power
- The water-based formula is effective and safe. It will neither damage nor dry skin
- Alcohol-free. No sting — allows for easier wound care!
- Non-irritating. Gentle on skin
- No stains or discolored skin, hair, or surfaces
- Non-bleaching
- Apply directly with the spray or via a cloth
- Environmentally safe & cost effective
